

2010 TREE AND SHRUB PLANTING PROGRAM

The Bancroft Area Stewardship Council and Bancroft Area Forest Industry Association facilitate the planting of over 15,000 trees and shrubs each year. The plants are made available each Spring to rural landowners and community organizations throughout the Stewardship Council catchment area on a “*first-come, first served*” basis. The cost of the plants is subsidized through generous donations and contributions from forest industry partners.

COST:

Coniferous Trees	Price / Tree	Shrub Mixtures	Price / Bundle
White Pine (Pw) Red Pine (Pr) White Spruce (Sw)	\$0.40	Shoreline Bundle: Alternate and Red-Osier Dogwood, American Elderberry, Nannyberry, American High-bush Cranberry	\$20.00 per bundle • 25 plants per bundle • mixture of listed species
White Cedar (Ce)	\$0.52		
Deciduous Trees	Price / Tree	Upland Bundle: Sumac, Hawthorne, Black Chokecherry, June-berry, Service Berry, Pin-cherry	
Red Oak (Or)	\$0.65		
White Ash (Aw) Hard Maple (Mh)	\$0.70 \$0.85		

LANDOWNER ELIGIBILITY:

Category 1	Category 2	Category 3
<ul style="list-style-type: none"> - own at least 10 acres of land suitable for planting - be a paid member of the Ontario Forestry Association or Ontario Woodlot Association - must have a management or planting plan prepared by a Forestry Consultant at the landowner’s expense - minimum order of 1500 trees and / or 2 shrub bundles (50 plants) per year 	<ul style="list-style-type: none"> - own less than 10 acres of land suitable for planting - minimum order of 100 trees and / or 1 shrub bundle (25 plants) per year to a maximum of 3000 	<ul style="list-style-type: none"> - for local community organizations, or individuals outside the catchment area - trees and shrubs will be supplied at cost (including transportation fees) on a case-by-case basis

Other Conditions and Criteria:

- The plants must not be resold, and must be used for the intended purpose at the site specified in the application. Plants can be used to rehabilitate open or harvested areas, to control erosion, create a windbreak or buffer, naturalize a shoreline, or create wildlife habitat.
- Site preparation may be required by the landowner. There must be a reasonable expectation that properly planted trees will survive.
- Recipients must agree to make a reasonable effort to control weeds or other competing species around the young plants, and provide adequate watering in the event of summer drought conditions, to help the plants get established.
- Landowners must agree to allow randomly selected post-planting inspections and survivability surveys to be conducted by Stewardship Council representatives. Landowners will be contacted in advance to verify timing.

Additional Information:

Only plants native to Ontario and in the appropriate seed zone are supplied through this program. Landowners ordering in excess of 500 plants may be eligible to borrow special tree planting equipment, and may also be eligible for volunteer assistance with planting and tending. All orders include a series of fact sheet on handling, planting and tending techniques, pest control, species selection, and a variety of other related topics. Applications are accepted throughout the year while quantities last up until April 1.

TO PLACE AN ORDER:

Complete the form on the back of this sheet and return it to the Stewardship Council office. Applications are reviewed by an Approval Committee in February, at which time confirmation notices are sent to qualified landowners. Orders will be available for pickup the first Friday in May from a designated location (TBD), and must be paid for in full before the plants leave the storage facility.

For more information, please contact Jon K. Orpana, R.P.F., A/Stewardship Coordinator at 613-332-3940 x260.

2010 TREE AND SHRUB PLANTING PROGRAM – ORDER FORM

LANDOWNER INFORMATION:

Name: _____ Phone: (H) _____
 Mailing Address: _____ (W) _____
 _____ (C) _____
 Email: _____ Fax: _____

PROPERTY INFORMATION:

Locational / 911 Road Address: _____ Roll #: _____
 Lot: _____ Concession: _____ Geographic Township: _____
 Total Property Size (acres): _____ Size of area to be planted (acres): _____
 Property Objectives: _____

CATEGORY: (Circle one) 1 2 3

For Category 1, complete the following:

- Woodlot Management or Planting Plan prepared by: _____
- Copy of the Plan is attached to this application.
- Is this property enrolled in the Managed Forest Tax Incentive Program? YES NO

SITE DETAILS:

Soil Type: _____ Soil Depth: _____
 Drainage: _____ Topography: _____
 What grows on the site now? _____
 How tall and thick is the vegetation? _____
 What has been done to ready the site for planting? _____
 Who will plant the trees? _____

ORDER: *NOTE: Use the category descriptions on the previous page to determine your maximum order size.*

CONIFERS:	Bundle size for all conifers is 10. Orders must be placed in increments of 10 units.		
	# Ordered	Price / Unit	Cost (\$)
White Pine		\$0.40	
Red Pine		\$0.40	
White Cedar		\$0.52	
White Spruce		\$0.40	
	TOTAL:
