Healthy plant and wildlife populations require healthy habitats. The goal of the native trees from seed program is to help community partners produce native trees from local seed to use in projects throughout Brant County.

How Far should the seed fall from the tree? Brant's native woody plant species have evolved over millennia to be specially adapted to local climate and sites - a process of Natural Selection. This means that Seed Source Matters - to the success of any planting project!

The Native Trees from seed program ensures that we are using the stock and species that are adapted to the project. Choose Brant's Natural Selections.

Project support was provided by Tim Horton Children's Foundation and the County of Brant—parks and Rec. Department.

The Natural Connections Program is funded by the Ontario Trillium Foundation.

St. George Public School Young Gardeners

Earth Day Tree Planting

King William Park, St. George

April 2006

For Earth Day in April, 2006 1 year old trees were planted at King William Park in the village of St. George by members of the public school's young gardeners club.

The trees were some of the ones planted by the club in Jan 2005 and grown at Tim Horton's Onondaga Farms.

Pictured below are the club members at King William Park.

Making the Holes!

Two children with their tree!
