

Funding Programs

The Rural Lambton Stewardship Network applies for funding to complete different habitat and non-point source pollution control projects for Lambton County. The following outlines the programs available currently.

- **St. Clair/Sydenham River Stewardship Initiative**

The goal of St. Clair/Sydenham River Stewardship Initiative is to improve water quality and quantity in the St. Clair and Sydenham River watersheds by assisting rural landowners in repairing sources of bacterial pollution on their properties, as well as enhancing or creating wildlife habitat in the targeted areas.

- **Healthy Waterways Initiative**

Healthy Waterways Initiative is an opportunity for rural and non-rural landowners to preserve, restore or enhance wetlands. The Rural Lambton Stewardship Network, Ducks Unlimited Canada (DUC) and St. Clair Region Conservation Authority have formed a partnership to provide you with the technical advice and assistance to complete wetland restoration projects in floodplain or riparian areas. By participating in this initiative you will not only receive technical expertise and the financial incentives necessary to complete a successful project but retain the right to enjoy and use your land while helping to improve the environment.
